Purpose of Advisory Group

In the fall of 2022, Rhodes College established the Advisory Group on Accessibility, Disability, and Universal Design, which reflects The College's commitment to institutional inclusion, diversity, equity, and accessibility and to fostering a sense of belonging among all members of the college community, including persons with disabilities. The advisory group's role is to ensure broad institutional input on matters relating to persons with disabilities of all

 Advise the president and senior leadership regarding access compliance with the Americans with Disabili es Act and best prac ces in fostering a truly inclusive, diverse, equitable, and inclusive community.

Group Membership

Advisory group membership consists of faculty, staff, and students. Initial members were appointed in 2022 by Carroll Stevens, J.D., interim president of Rhodes College. Members for 2023-2024 are listed below.

Faculty:

- Kim Brien, Ph.D., Associate Professor, Chemistry
- Eric Got lieb, Ph.D., Associate Professor, Mathema cs & Computer Science
- Eric Henager, Ph.D., Associate Professor, Spanish
- Vanessa Rogers, Ph.D., Associate Professor, Music

Staff:

- Anne Beard, Chief of Sta , Co-Chair
- Darlene Brooks, Director, Barret Library
- Melissa Butler, Director of Student Accessibility Services, Co-Chair1nxx

• Completed to date: Compiled a comprehensive list of all digital pla orms currently used at Rhodes College. Researched best prac ces for digital access and explored ways to ensure that accessibility is considered when the college purchases new so ware.

2023-2024

Anne Beard and Melissa Butler co-chaired the advisory group from fall 2023 through summer 2024. The advisory group met once during fall 2023 and once during spring 2024. Below is a summary of progress during this period. The group decided to continue focusing on the digital, learning, and physical environments.

Student Accessibility Services Updates

- 24% of Rhodes students were registered and approved for accommoda ons during 2023-24.
- AIM so ware: SAS was approved to acquire and implement a new data management so ware, AIM, during summer 2024. AIM will streamline SAS processes for the 470+ registered students with disabili es and improve faculty no fica on let ers. There will be a student portal and a faculty portal. This request was supported by the advisory group.
- Anthology Ally so ware: SAS, Student Success, and Academic A airs were approved to acquire and implement Anthology Ally so ware during fall 2024. Anthology Ally will integrate with Canvas, allowing all students to select their format preference for digital materials (e.g., mobile-friendly, PDF, audio, digital braille, etc.). Ally then instantly converts and provides the requested format. It also provides guidance for fixing access issues and ins tu onal data on progress. This request was supported by both the advisory group and the Diversity & Equity faculty commit ee.
- During 2024-25, SAS will promote AIM and Anthology Ally so ware awareness with faculty, sta , and students, and assess the impact on the learning and digital environments.

Digital Environment Subcommittee Updates

- Informa on Services confirmed that the college considers accessibility compliance when acquiring new digital pla orms.
- In order to raise awareness on promo ng greater digital accessibility on campus, we need to first darify the scope (e.g., for exis ng pla orms or for websites, PDFs, hyperlinks, alt text, etc.).
- The acquisi on of Anthology Ally so ware will significantly improve accessibility in the digital environment, moving us forward with Universal Design by ensuring accessible digital content for all students. The provision of ins tu onal data and guidance on accessibility of course content will allow Rhodes to assess digital access progress over me.

Learning Environment Subcommittee Updates

• The subcommit ee discussed ways to include accessibility representa on in standing faculty/campus commit ees (e.g., DEI faculty commit ee, technology and academic space planning faculty commit ee, etc.) and ways to get Universal Design on the campus radar to make it second nature.

- Eric Got lieb agreed to lead the subcommit ee this year and explored op ons for eleva ng the access/SAS lens.
- SAS Director was voted by faculty to become a permanent ex-o dio member of the Diversity & Equity faculty commit ee.
- The advisory group discussed ways for students with disabili es and SAS to improve partnerships with faculty. The subcommit ee will explore conversa ons and/or small focus groups with students with disabili es and the possibility of revisi ng the Tes ng Room assessment and faculty concerns.
- SAS will con nue to promote best prac ce resources for accessible course/program
 materials and inclusive event planning. SAS has received feedback from faculty that they
 need professional development in areas of accessible digital content and Universal
 Design for learning. The topic of access will be included in August faculty development
 training and new faculty orienta on.

Physical Environment Subcommittee Updates

- SAS and subcommit ee members con nued to maintain a spreadsheet for physical barriers and the college's response e orts.
- The subcommit ee discussed reviewing the 1996 campus audit and determining next steps. Considering that today's needs may require/desire more than one accessible entrance per building, we could consider dividing this task into mul ple parts (1) Ini al survey looking at 1996 report; Rhodes decides internal priori es. (2) More detailed survey to darify barriers and fixes. (3) Iden fy top improvements that would have the greatest impact. Note: The subcommit ee was unable to manage this task with current workload demands. Addi onal guidance is needed.
- Subcommit ee progress stalled somewhat due to the Director of Physical Plant's re rement. A summer 2024 subcommit ee mee ng will be scheduled with Je McClain, new Director, to discuss next steps for subcommit ee and preferred ways to promote repor ng access barriers

IDEAs 2.0

• Sherry Turner inquired about the group leading an Access/IDEAs 2.0 workshop during 2024-2025. Anne, Melissa, and Sherry will brainstorm and explore date op ons.

Membership Updates

- Three student members graduated in May 2024 and will need to be replaced for 2024-2025.
- The group needs to establish a process for new member selec on and work toward a staggered replacement of members to avoid having all new members every three years.
- Moving forward, the group agreed that members will serve three-year terms, designate
 a leader for each subcommit ee, and develop a meline for future advisory
 group/subcommit ee mee ngs.
